

**95-865 12/5/2017:
Some Announcements**

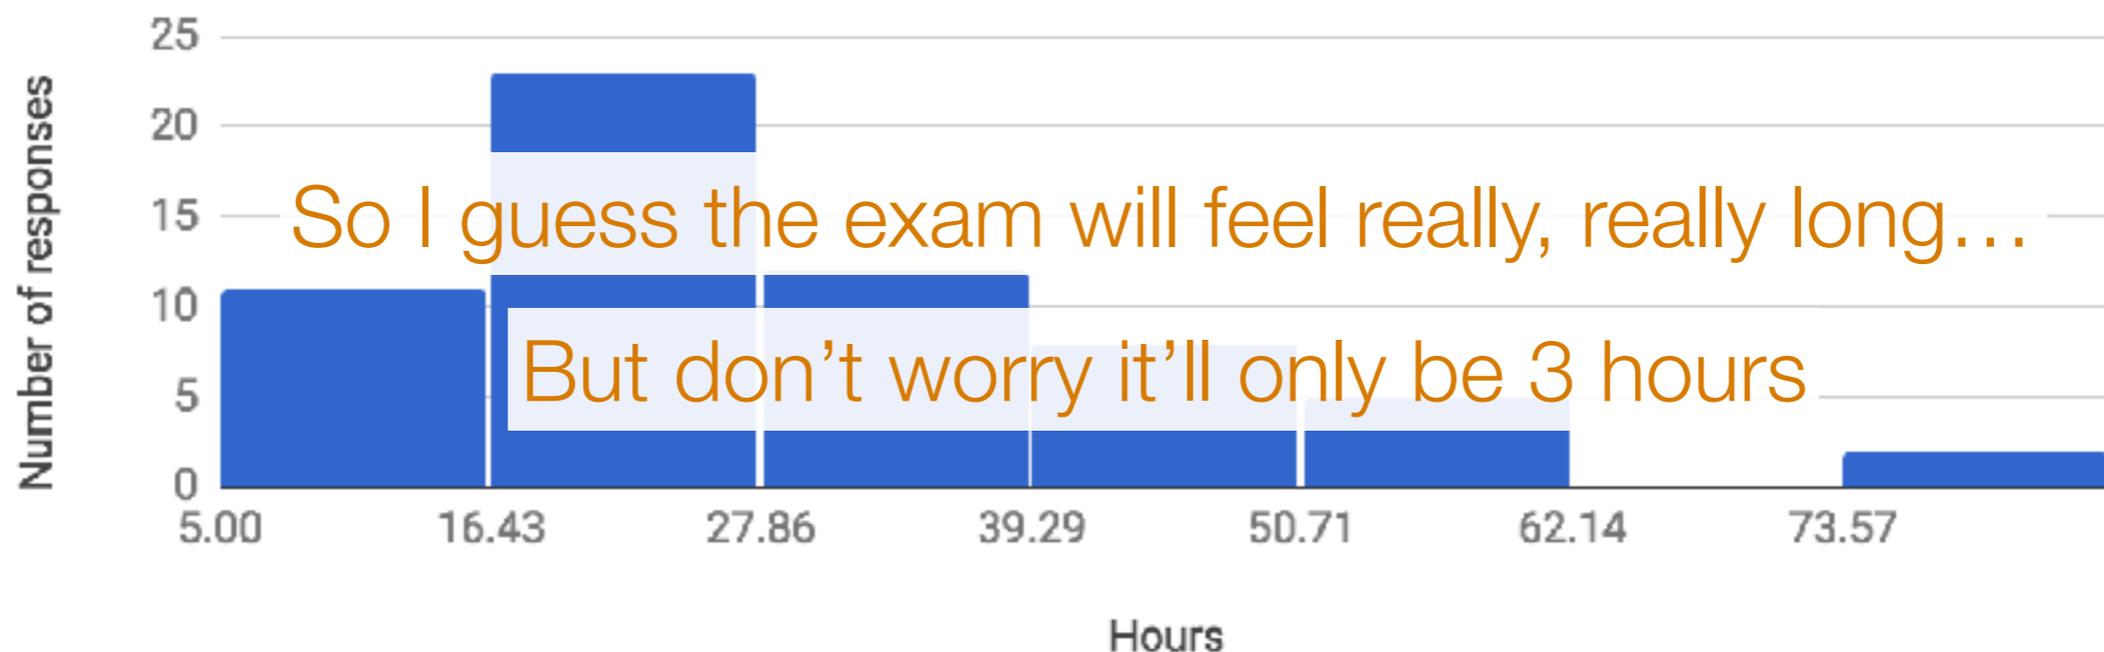

Final Exam

- Next Friday 12/15, 1pm-4pm (get excited!)
- Bring a laptop to work on (Jupyter notebook)
 - You are responsible for making sure your laptop is working properly, has enough battery life, etc
 - You do not need AWS but you are free to use it: you are responsible for sorting out technical issues with AWS
- Open book: you may use course materials, API documentation, stackoverflow, etc (be sure to cite external resources like stackoverflow if you use it)
- No collaboration (so obviously do not post to Piazza)

Final Exam Length

- 2 problems
- We're targeting the length to be completable by course staff in about 30 minutes, and you'll get 3 hours
- For reference: we target homework to be completable in a couple of hours by course staff

HW2 Self-Reported Number of Hours to Complete

Other Things

- Review session this Thursday during lecture time!
 - **Bring a laptop!** There will be a simulation for answering a question under time pressure similar to how the exam will be like
- If you cannot make the regular final exam time, let us know immediately
 - If the conflict is with Dave Choi's final, please bug Dave!
- Some nice neural net videos by 3Blue1Brown are posted in additional "reading" (thanks Pranshu for pointing these out!)
- I will not have office hours this Friday (I'll be at NIPS)

Faculty Course Evaluations

- Please answer these to provide valuable feedback/vent your frustration
