Mike Rainey

Education

2007–2010 **Ph.D.**, *University of Chicago*, Chicago, Computer Science

2004–2007 **M.S.**, *University of Chicago*, Chicago, Computer Science

2000–2004 **B.S.**, *Indiana University*, Bloomington, Computer Science & Cognitive Science

Employment

2021–present **Researcher**, *Carnegie Mellon University*, Pittsburgh, PA, USA
Doing research on task-parallel/multicore programming.

2019–2020 **Researcher**, *Carnegie Mellon University*, Pittsburgh, PA, USA
Carried out research on task-parallel/multicore programming.

2018–2019 **Researcher**, *Indiana University*, Bloomington, IN, USA
Carried out research on task-parallel/multicore programming.

2014–2018 **Researcher**, *INRIA*, Paris, FR
Carried out research on task-parallel/multicore programming.

2011–2014 **Postdoctoral researcher**, *Max Planck Institute for Software Systems*, Kaiserslautern, DE
Carried out research on task-parallel/multicore programming.

2007 **Summer internship**, *Intel*, Santa Clara, CA, USA
Under supervision of Anwar Gluloum, performed research on language support for multicore systems.

2006–2007 **Programming project**, *University of Chicago*, Chicago, IL, USA
Extended the MLRISC code generator to support the AMD64. Supported by NSF Grant CRI: Standard ML Software Infrastructure. Principle investigators: David MacQueen and John H. Reppy.

2003–2004 **Research assistant**, *Indiana University*, Bloomington, IN, USA
Under supervision of David S. Wise, designed and evaluated performance of cache-aware and multiprocessor matrix-factoring algorithms.Supported by NSF Grant CRI: A Paradigm of Parallel Programming for Morton Ordered Matrices.

Software artifacts

Manticore, *Parallel dialect of Standard ML*, This artifact consists of a parallel, functional programming language aimed at general-purpose applications running on multi-core processors. I contributed code to the compiler and runtime system, with particular focus on load balancing for parallel workloads and on code generation
`http://manticore.cs.uchicago.edu/`

Chunkedseq, *Chunked sequence data structure*, This project features a C++ template library which implements ordered, in-memory containers that are based on the B-tree-like data structure I coauthored with Umut Acar and Arthur Charguéraud [ACR14]
`http://mike-rainey.site/chunkedseq/chunkedseq.html`

PASL, *Parallel Algorithm Scheduling Library*, I coauthored this library with Umut Acar and Arthur Charguéraud
`http://deepsea.inria.fr/pasl/`

SML/NJ, *Standard ML of New Jersey*, I worked on the back end of the compiler. My main projects covered code generation for the x86_64 and support for foreign-function calls
`http://smlnj.org/`

PDFS, *Parallel DFS*, This project features a C++ implementation of the fast DFS-like graph-traversal algorithm from the SC'15 paper [ACR15]
`http://mike-rainey.site/pdfs/pdfs.html`

Teaching

Course materials

2014 **PASL book and minicourse**
In 2014, Umut Acar and I authored course materials on multicore computing. We were motivated by a gap between the teaching of theory and practice of parallel computing that we believe existed in the undergraduate algorithms course at Carnegie Mellon University, where Acar teaches. We were also movitivated by the desire to hone an automatic granularity-control technique that we developed as part of our research collaboration [ACR16b; ACR11]. We used the course materials to teach a two-week, NSF-funded, undergraduate course at the University of Puerto Rico PASL Workshop (`https://sites.google.com/site/paslpr14/home`). Later, in 2014, we introduced updated materials into the undergraduate algorithms course at Carnegie Mellon University. I served as guest lecturer in 2014 and 2015, and since then, this material has been reused several times in the course. The course materials are available on the course website (`http://www.cs.cmu.edu/~15210/pasl.html`).

Teaching assistantships

2009 **Implementation of Computer Languages - II**, *University of Chicago*, Spring

2007 **CSPP Networks**, *University of Chicago*, Winter

2006 **Introduction to Computer Systems**, *University of Chicago*, Spring

2006 **CSPP Unix Systems Programming**, *University of Chicago*, Fall

Selected talks

2019 **Provably and Practically Efficient Granularity Control**, *PPoPP*
