SCIMAX

Bringing plain text to life

John Kitchin has developed open source software which improves data sharing and efficiency in research and academia. The software uniquely integrates data processing and analysis directly into plain text.

WHY IS DATA SHARING SO IMPORTANT?

Data sharing is necessary for the advancement of science. We're doomed to repeat the results of the past unless we know more about the research that has come before us.

— JOHN KITCHIN
Professor of Chemical Engineering,
Carnegie Mellon University

CREATES EFFICIENT **TEACHING** ENVIRONMENTS

MAKES **RESEARCH** COLLABORATION EASIER

STREAMLINES **PUBLISHING** PROCESSES

INTEGRATES **NOTE TAKING** WITH **DATA ANALYSIS**

BUILDS INTERACTIVE **APPS**
