- Programming in C++
- Programming in Python
- Advanced Networking
- Hands-on Experience with Single-Board Computers

---

## Education & Testing

---

### Al-Quds Secondary School

August 2020 – June 2023

Cumulative GPA: 99.80%

**SAT:** 1510 (790 in Math with 720 in English)

**Qudurat (Local Aptitude Test in Saudi Arabia):** 98%

**Carnegie Mellon University Qatar (Computer Science)** - Currently

---

## Extracurriculars

---

### AlwaysThere

11th Grade – Present

I founded AlwaysThere, a cloud-based backup solution that safeguards businesses against potential data losses.

- Licensed it to three corporations
- Made more than \$1,000 in subscription

### Arqa (a term that means “classier”)

11th Grade

My friend and I developed a mobile app for our local municipality that encourages people to actively contribute to the cleanliness of the city.

- Ranked the winner app in a regional environmental contest
- We received a letter of appreciation for developing it from the Education Office in East Dammam

### FaceFinder

11th Grade

I built an AI program that trains on faces on the Internet to later search through them for a given input face, yielding the page link to that match.

- Successfully recognized almost all known public figures

### Malware Research

10th Grade – Present

I managed to build several proof of concept malware that evade almost every antivirus solution.

- It successfully evaded many prominent antivirus software, such as Avast, Kaspersky and Windows Defender
